Profile

IT Engineer with experience in IT Support, Digital Transformation, Network Administration, and Systems Maintenance. Skilled in troubleshooting hardware/software issues, supporting IT infrastructure, and implementing technology solutions. Strong background in programming, embedded systems, and technical problem-solving.

Skills

- IT Support & Help Desk
 - System Maintenance
 - Microsoft Office
 - HTML/CSS
 - Arduino

- Hardware & Software Troubleshooting
 - Digital Transformation
 - Python
 - PHP
 - Problem Solving

- Network Administration
 - ERP Systems
 - C++
 - Embedded Systems

Education

09/2020 – 07/2024	Bachelor of Engineering in Medical Instrumentation Techniques Engineering, Al-Farahidi University – Medical Technical College Graduation Project: Design and Implementation of a Syringe Pump • Grade: Excellent (Distinction) • Developed a high-precision medical syringe pump system for controlled intravenous fluid delivery. • Integrated stepper motors and microcontrollers with custom programming to ensure accurate flow rates. • Conducted performance testing and calibration to meet medical safety standards and dosage precision.	Baghdad–Iraq
-------------------	---	--------------

Professional Experience

07/2024 - 06/2026	Digital Transformation and Electronics Center - Al-Farahidi University, IT Support • Manage and maintain the university's IT infrastructure, including server administration and network stability. • Implement digital transformation initiatives to enhance administrative and academic electronic workflows. • Perform comprehensive hardware and software maintenance, troubleshooting, and system optimization. • Administer network configurations and security protocols to ensure seamless connectivity across departments. • Provide technical support and innovative solutions for complex IT problems within the digital center.	Baghdad
2023 - 2024	Self-Employed, Embedded Systems & Electronic Projects Designer • Designed and implemented advanced Embedded Systems and Arduino-based projects for engineering graduation research. • Developed specialized electronic systems for Telecommunications engineering, including Signal Jammers and Morse Code communication devices.	Baghdad
2022 - 2023	Self-Employed, Full-Stack Web Developer	Baghdad
06/2020 - 05/2021	Al-Hikma Office for Medical Devices, Maintenance of medical devices • Gained hands-on experience in the installation and preventive maintenance of various medical devices. • Developed strong technical troubleshooting skills by identifying and fixing equipment malfunctions under professional supervision. • Assisted in the calibration and testing of medical instruments to ensure compliance with safety standards. • Demonstrated rapid learning and adaptability by mastering technical tasks during the first year of engineering studies.	Baghdad

Courses

2019	HTML, CSS, and Javascript for Web Developers, Coursera	online
2018	From Zero to Hero in Python, Udemy	online
2018	PHP for Beginners: Become a PHP Master, Udemy	online
2020	Arduino Step by Step: Getting Started, Udemy	online
2021	Advanced Maintenance of Electrocardiograph (ECG) Devices, Galenos Medical Foundation	Baghdad
2021	Maintenance and Calibration of Electrosurgical Units (ESU), Nabda for Biomedical Engineering	Baghdad
